

Great progress has been made in the six years of the project as shown by the total of 302 publications up until September 2018. The ADITEC publications were cited >5,800 times and the citation impact is almost 3 times the average citation impact of all Web of Science papers published in “Immunology” area in the time range 2012-2017 (5.87).

The total impact factor is 1.858 with an average JIF for paper = 7,94 and 73% of papers have been published in journals with impact factors in Quartile 1 of their respective subject categories.
